

Caylix, a full-service email and Internet provider, delivers a web filter that is based on Biblical principles. Having partnered up with , the most reliable filtering technology on the market, we are able to offer you, your family, or your business the best possible filtering solution available.

filtering products

Our core product is a web content filter integrated with your connection to the Internet. This ensures that there is no possible way to bypass our filter. We also scan your incoming emails for spam and viruses. No additional software is required on your computer.

levels of filtering

Caylix offers two levels of filtering, which are available on any of our connection types. These filters are designed to provide a secure and functional balance of filtering and firewalling, based on your needs.

key features

- Completely protected connection
- Connected directly to Caylix
- No additional monthly fees: email, Internet, and filter are included
- Deal directly with Caylix for all your Internet needs
- Current email addresses can be forwarded to your @caylix.com email account
- Canada-wide dialup access
- "FAST" accelerator for dialup available
- Highspeed ADSL or Wireless available in BC, Alberta, and Ontario (subject to availability)
- Great for businesses, home users, and schools

Caylix Safe

This is a safe Internet of pre-screened sites that have been checked and approved by a team of experts. Only sites that have been looked at and compared to the filter criteria are permitted. All other sites are blocked. Additional sites can be added with ease, using our website. This package is for those seeking a completely safe Internet experience. Currently the whitelist has over 100,000 sites.

Caylix Flexible

This allows access to most of the Internet, except for sites that are blocked by either the black list or the content filter. The content filter searches for inappropriate phrases in the actual pages. Other than making it safer, this screening process has no effect on your Internet experience. Additional sites can be submitted for blocking through our web page.

internet connections

Dialup

STARTING FROM
\$17⁹⁵
MONTH

Dial-up access is really just like a phone connection, except that the parties at the two ends are computer devices rather than people. A dial-up connection has lower data speeds than other connections, but it's advantage is that it is available wherever a voice telephone line is.

ADSL

STARTING FROM
\$41⁹⁵
MONTH

This connection also goes through your phone line, but is online 24x7: there is no need to dial in. You can talk on the phone and be connected to the Internet at the same time. ADSL is between 50 and 150 times faster than dialup. However, there is limited availability, depending on the local telephone company and the distance to the central phone office.

Wireless

STARTING FROM
\$54⁹⁵
MONTH

This option is intended for those who need a faster connection than dialup, but are not in an ADSL service area. We install a wireless antenna on the roof of your house or business, which connects to a tower up to 30 km away. Speeds are nearly the same as ADSL. The connection is also 24x7.

other services

- Email only (no Internet and no filter)
- Remote and onsite support
- Domain name registration (e.g. www.yourbiz.ca)
- Webpage and email hosting (e.g. you@yourbiz.ca)
- Time Control Software Control when, how long, and for what activities your children use the computer
- Offsite Data Backup
- Fax to Email
